INVESTIGATIVE ACTION

On February 18, 2015, Lt Luckenbaugh was made aware of the incident and provided with a brief summary of what had taken place as noted above on February 19, 2015. Lt Luckenbaugh was provided with a summary from CID and contacted Lt Leppert (CID) to determine what criminal investigation was taking place. Lt Leppert advised that DFC Shaffer had been assigned as the primary investigator with oversight from Sgt Tanis. Lt Leppert informed Lt Luckenbaugh that photographs of Dobbs' injuries had been taken and that he was still at the University of Maryland Shook Trauma Center. He suffered significant facial injuries from the second deployment of the L6 and vision issues were due to swelling of the facial tissue around the eyes. CID was moving forward with forensic analysis of Dobb's Playstation 4, laptop computer and cell phone to which they had not yet determined if Dobb's had held a role in the incident. This incident was indicative of "swatting",

Lt Luckenbaugh captured the audio recordings of both the 911 call from MCAC as well as the subsequent radio transmissions from Patrol, Tactical and Command from Channels Alpha 1 (A1), Charlie 1 (C1), Charlie 2 (C2) and Charlie 4 (C4).

A1 communications between Dispatch and responding units indicated a previous call with Tyran Dobbs at the location as well as alerts that Dobbs was a drug user and resists arrest. Communications on A1 consisted of logistics in response to the call, authorization of a Tactical call-out, setting up alternate communication channels and the staging location. It also identified that the "B" apartment was the second apartment on the right which faces both the front and rear,

Radio communications between C1, C2 and C4 were inter-mixed and are captured in combination below with relevant communications captured as follows:

1853-1907 hours: Various communications unrelated to L6 deployment

Based on radio transmissions, it sounded as if the Command Post did not arrive on scene until approximately 1820-1830 hours.

Netviewer review of the call was captured as well as I-leads history for Dobbs. It was noted that Tyran Dobbs had multiple I-leads entries from 2008-2014 and two recent alerts for drug user and resists arrest. Incident reports, supplements and use of force reports were also captured relevant to the injury to Dobbs. Photographs of the incident scene and Dobbs' were also obtained through CST Terri Payne.

During the course of the resulting investigation, it was determined that two civilians captured the deployment of Tactical officers and the Bearcat during the operation by video. Both videos were obtained on February 23, 2015 by CID; however, subsequent interviews of the civilians by CID were fruitless. Both videos were captured from approximately the same location and Lt Luckenbaugh obtained them through Lt Leppert. Another civilian was interviewed by DFC Shaffer and Cpl Branigan after the incident and provided information consistent with the videos.

The first video only captured the Bearcat and its deployment to the rear of the residence and was approximately ten (10) seconds in length. The second video was captured from a short distance away from the Bearcat, was approximately fifty-four (54) seconds long and detailed the following:

- Bearcat parked to the rear of the residence (slider side), facing in toward the residence with lighting illuminating the rear of the residence.
- There are two female voices in the background during the 54 seconds stating "Fuck....oh my god we just got that...did they shoot him....yeah (Inaudible)...oh my fucking god....oh shit....I don't think that was bullets do you....that was bullets Kara, did you see the guns" (video ends). The female voices are irrelevant to the investigation thus not captured within the timestamps below.
- Commands can be heard from officers at the Bearcat toward the residence as following:
 - Inaudible but vocal statements from :01 through :04 (seconds)
 - :05 – What was that again?
 - :06 – Put both hands up
 - :08 – Alright man put your hands up
 - :10 – Put your hands up
 - :11 – Put em up; put em up (from the Bearcat PA) and multiple other commands that are inaudible from other officers
 - :13 – Deployment of first and second L6 rounds
 - :14 – Crying / moaning coming from the residence
